LARGE PRIVATE WATER COMPANY

ABOUT THIS CASE

A large investor-owned utility was having trouble finding a qualified electrical-mechanical and SCADA technician who had experience with water distribution and treatment systems. **waterTALENT**'s electrical mechanical technician helped them accomplish in weeks tasks they anticipated to take months and supported operations across multiple service areas for the company.

POSITION

- Electrical Mechanical Technician

POSITION DETAILS

- Installed, troubleshot, calibrated, and repaired all electrical and electronic control systems within entire water system
- Repaired entire electrical panels, SCADA systems, motor controls, PLC's, etc.

OPERATOR EXPERIENCE

- 23 years experience
- Certified in Water Treatment and Distribution
- Final position: Water System Operator III

DURATION

- Saw large projects come to successful completion well ahead of deadline, effectively fulfilling all of the major needs with plenty of room to spare
- Used this time to help out another branch/region with their projects.

AFTERMATH

Transitioned to an entirely different municipality in need of strong electrical/mechanical skills to help facilitate and operate a full SCADA system overhaul.
